

Air Systems offers the broadest range of service programs in the industry.

- ✓ The largest *local* team of OEM certified compressed air equipment technicians
- ✓ Annually safety trained in over 20 categories, including NFPA70E and LOTO
- ✓ *Online Customer Portal* provides live access to scheduling, work history, inspections, order status, documentation, and more...

SERVICE PROGRAMS

Planned CARE[®]

PM Program

Predictable, on-time planned services and diagnostics.

Program includes:

- Scheduled services with full mechanical and electrical inspections
- Lubricant testing
- Cooling water testing
- SPM vibration trending
- Infrared thermal imaging
- Optional RMX remote analytics and monitoring

All information is digitally stored and accessible to you at anytime through our online customer portal.

Fixed Price Option: Predetermined PM scope, schedule, and level loaded invoicing

Usage-Based Price Option: Low initial commitment with additional PM services quoted/approved each month as needed

Select CARE[™]

Extended Warranty Coverages

Select additional coverage levels for any equipment regardless of age or brand.

Program includes:

Coverage for new units:

- Full parts and service for 5 years on major components (Airend, Motor, Coolers, VSD, Controller, Integrated Dryer)
- Up to 10 years Airend coverage for select models

Coverage for existing units:

- Multiple coverage option levels for up to 10 years
- Major components, Airend only, or Drivetrain Only levels

Coverage Premium: Added to PM pricing based on coverage level selected, term, and age of equipment

Package CARE[™]

Full Risk Transfer Program

Flange to flange coverage without exceptions or limitations. The industry's only all-inclusive program, backed by Ingersoll Rand.

Program includes:

- All costs for PM and repair without any exclusions or fine print
- Agreements offered for any term, on any piece of equipment, renewable indefinitely
- Pricing is risk based, determined by equipment age, environment, and term length
- Coverage backed by Ingersoll Rand
- Includes RMX remote analytics and monitoring to maximize uptime and reliability

Fixed Price Option: Fixed price invoicing predetermined for the entire agreement

Usage-Based Price Option: Variable monthly pricing based on actual air usage

Utili CARE[®]

Utility Air Program

An alternative to purchasing new equipment—easiest way to realize efficiency and reliability improvements.

Program includes:

- Short term temporary equipment rental options
- Standardized long term modular air plant option
- Configurable option allows for customized system design to meet company goals and objectives

Usage-Based Price: Variable monthly pricing based on actual air usage
